

# Let's Get Practical!

Working with sliders and levers

### **Sliders**

# Using a straw and dowel

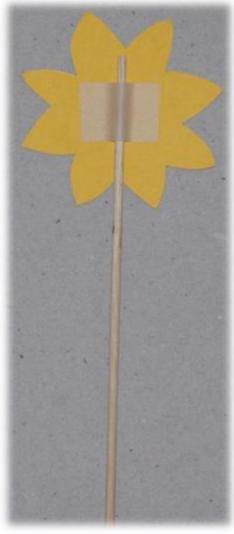

### **Tools and materials**

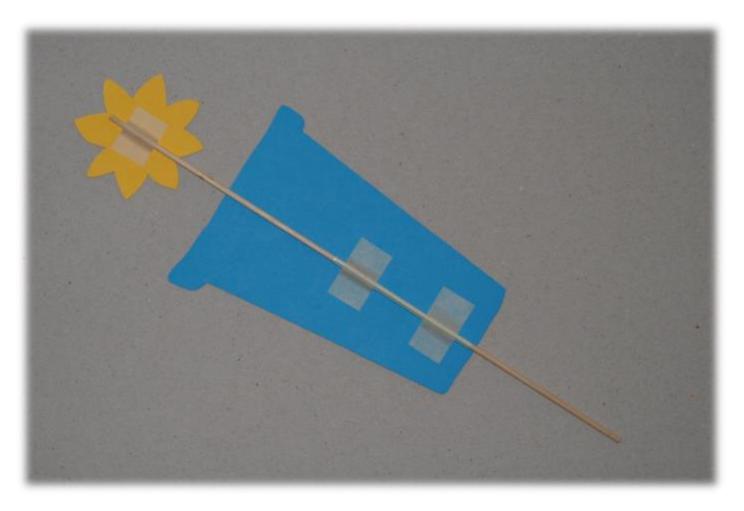

# Creating the slider

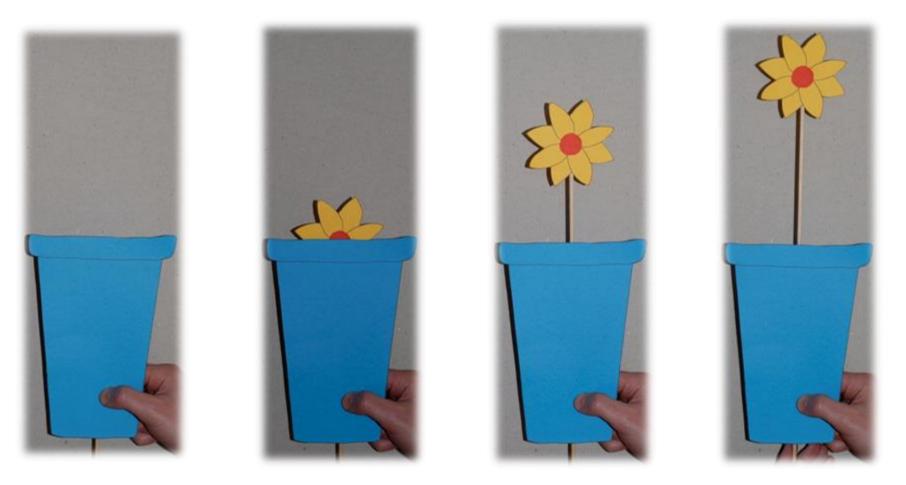

# The final design (reverse)

# The final design in action

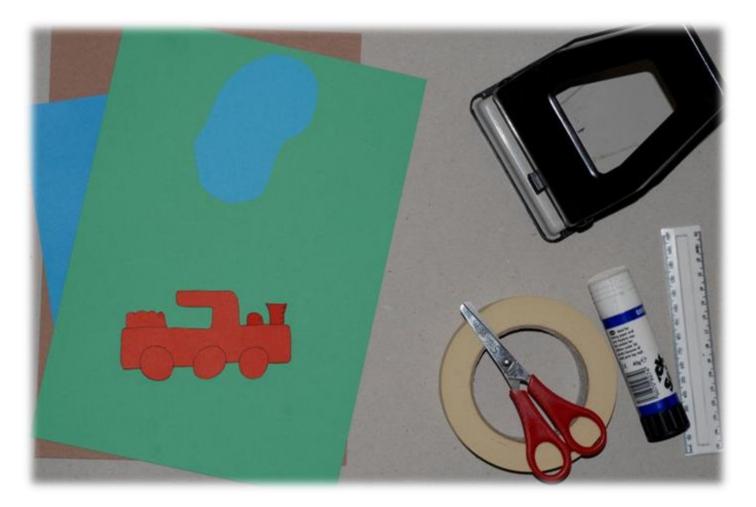

### **Sliders**

# Cutting a slot for the slider

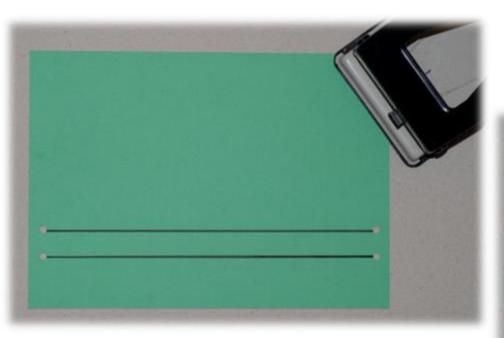

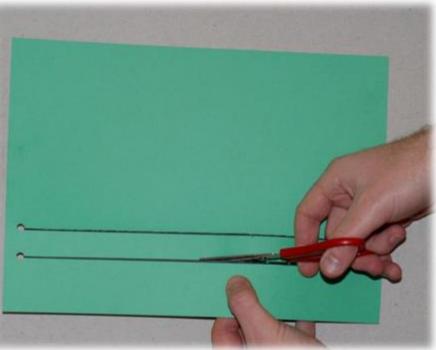

### **Tools and materials**

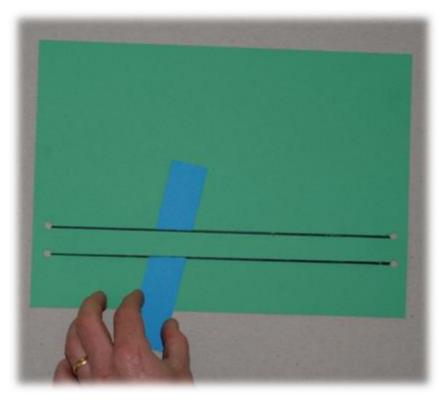

# Cutting the slot

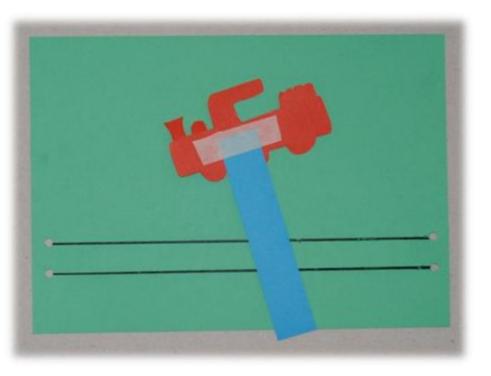

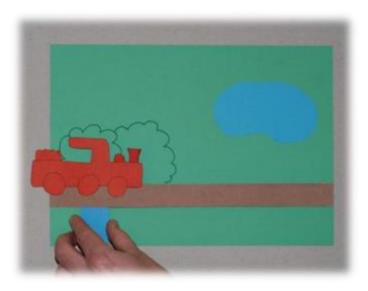

# Making the slider

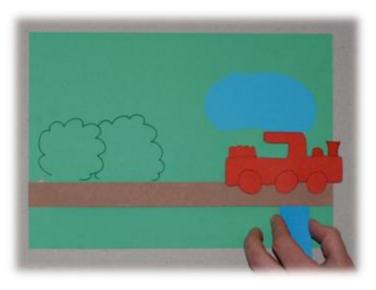

# The final design in action

# An alternative idea

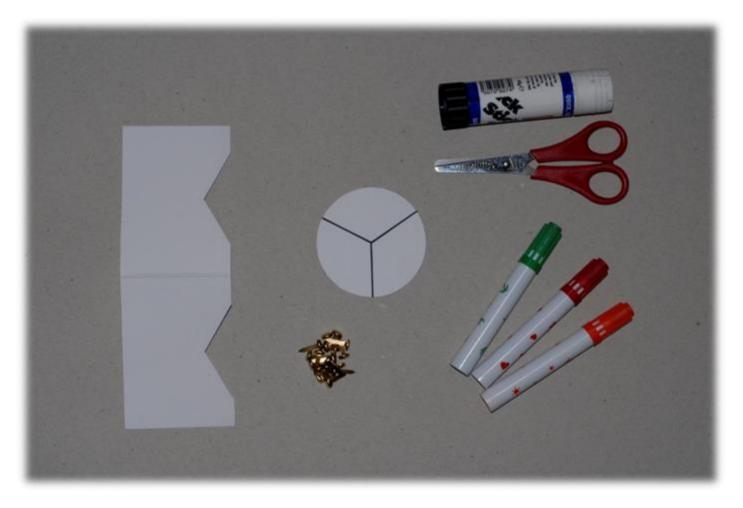

# Simple lever

# A feedback fan for use in lessons

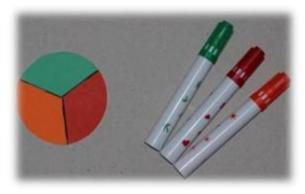

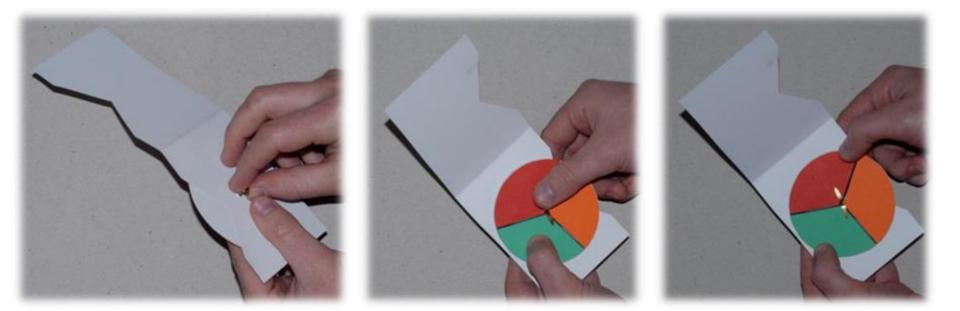

### **Tools and materials**

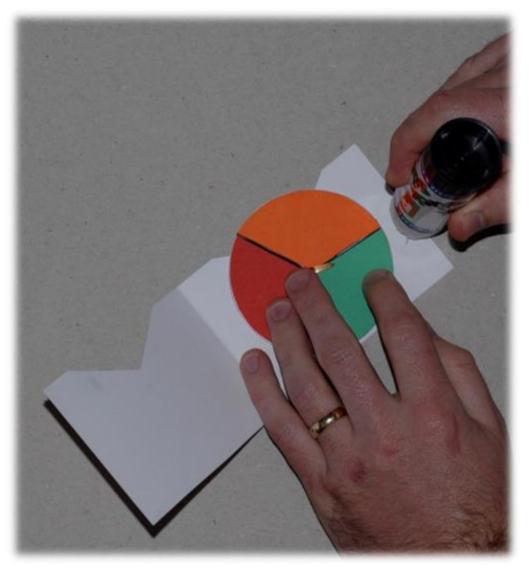

# Attaching the wheel

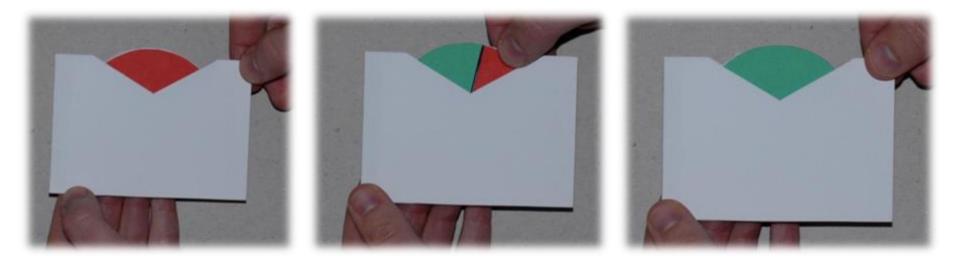

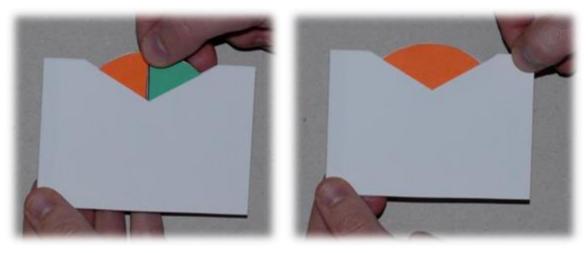

# **Gluing together**

## The final design in action

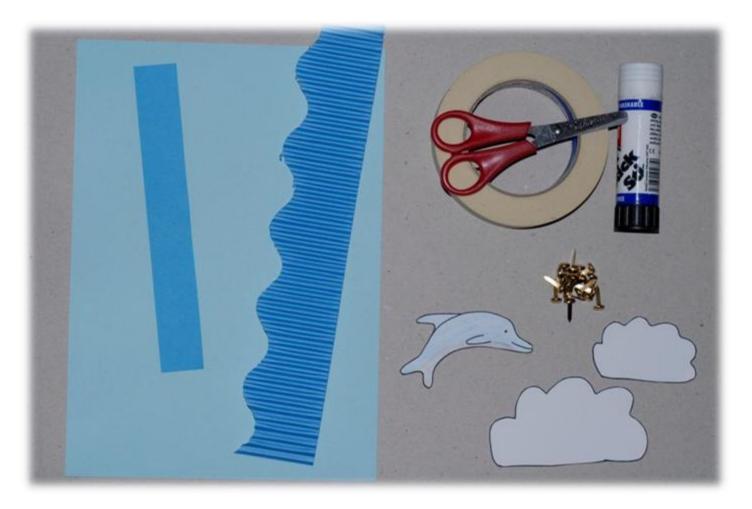

# Simple lever

# A leaping dolphin

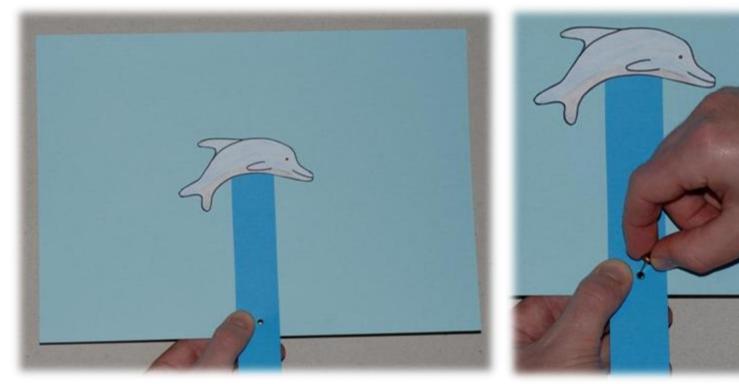

### **Tools and materials**

# Attaching the lever

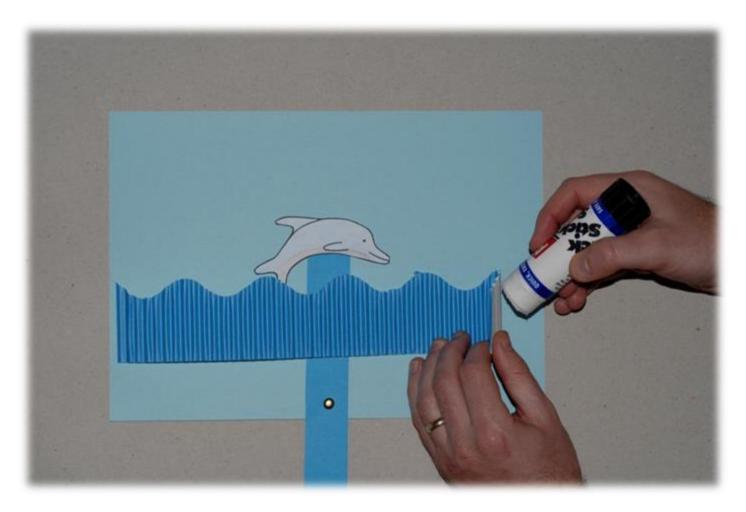

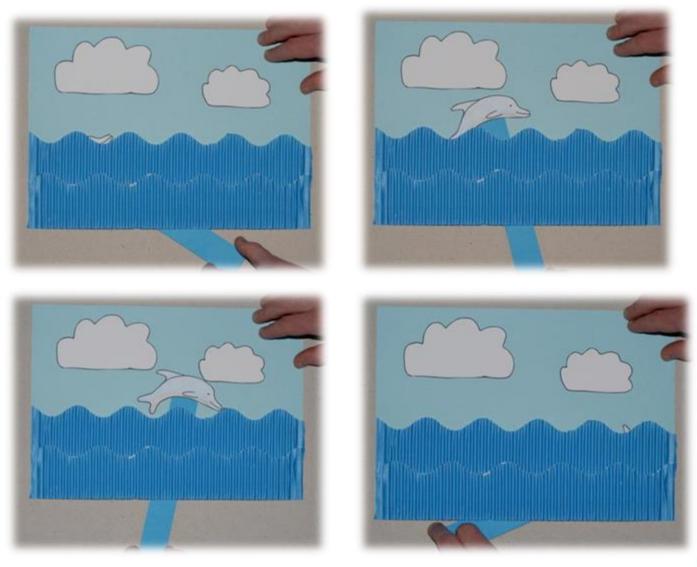

# Finishing off

# The final design in action

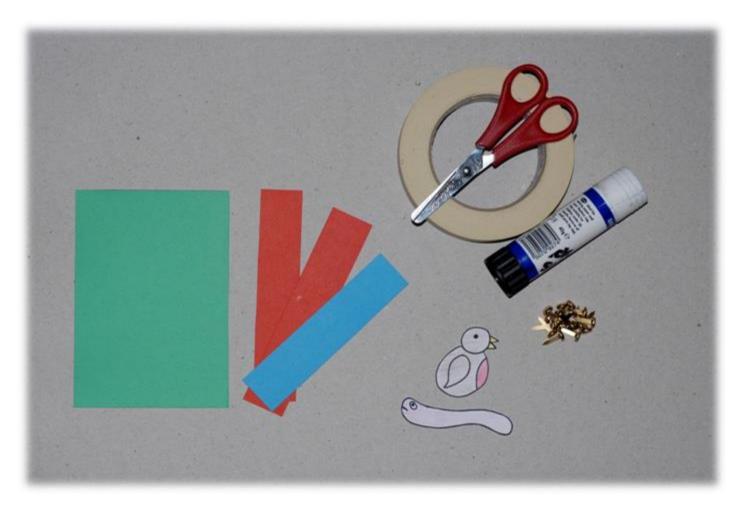

# A simple lever and linkage

# The early bird catches the worm!

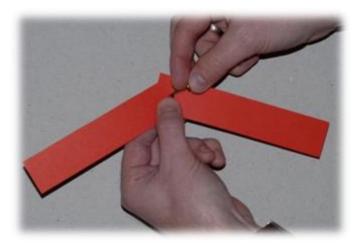

### **Tools and materials**

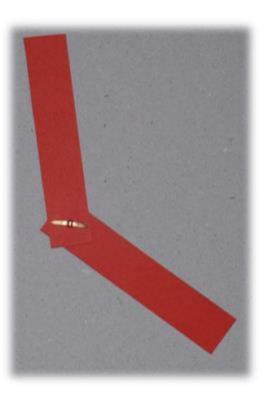

# Making the linkage

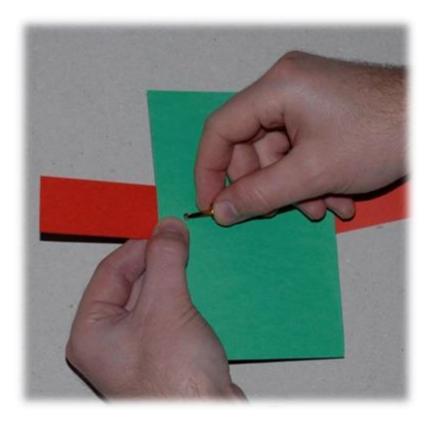

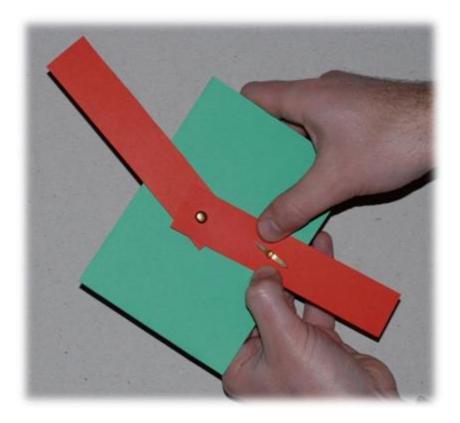

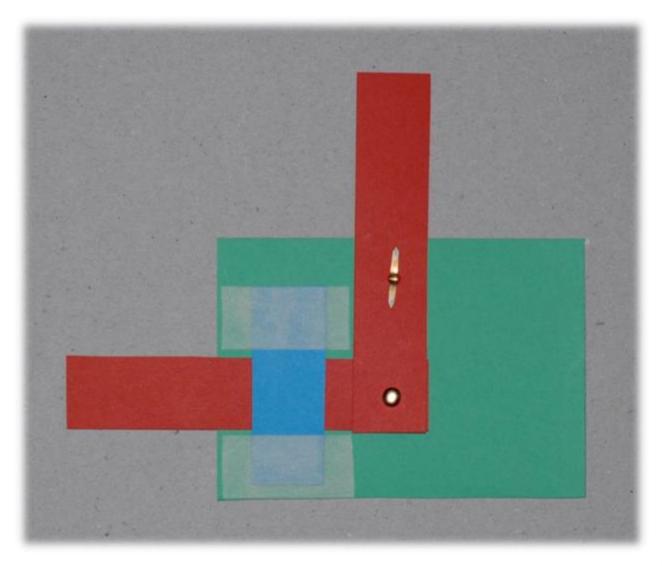

# The fixed pivot

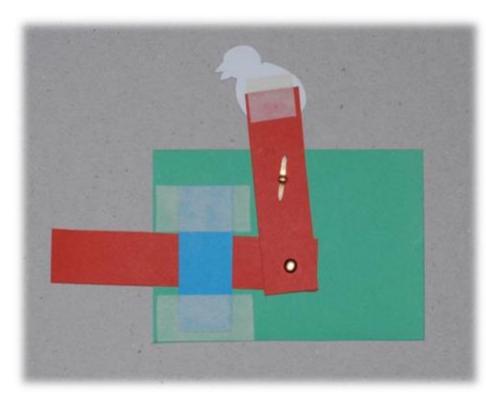

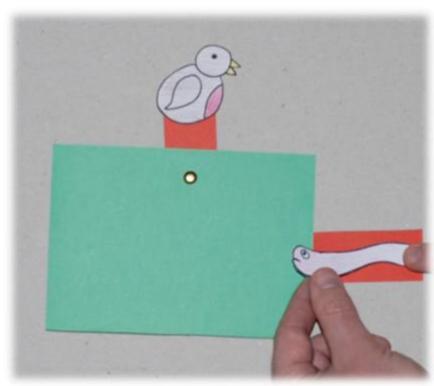

# Adding a guide strip

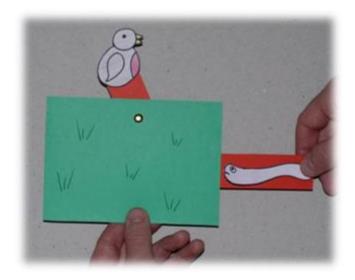

# Finishing off

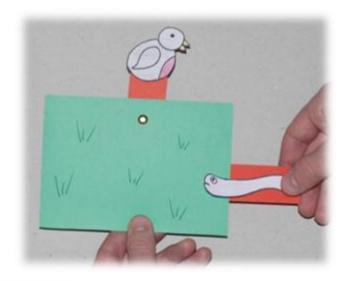

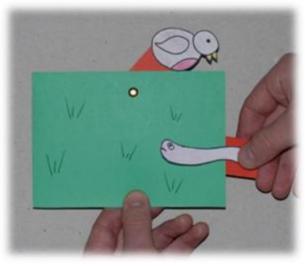

# The final design in action

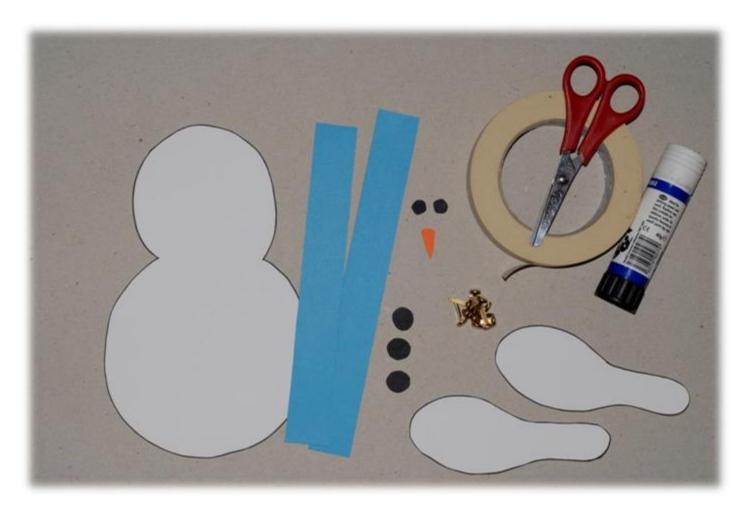

# A double lever and linkage

### Snowman

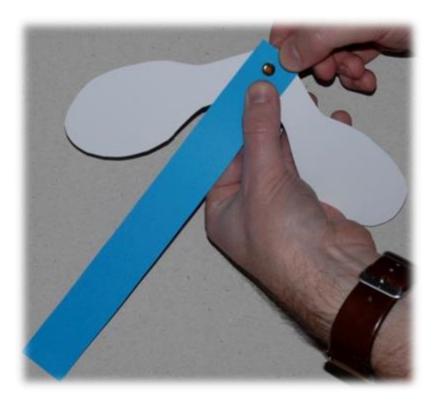

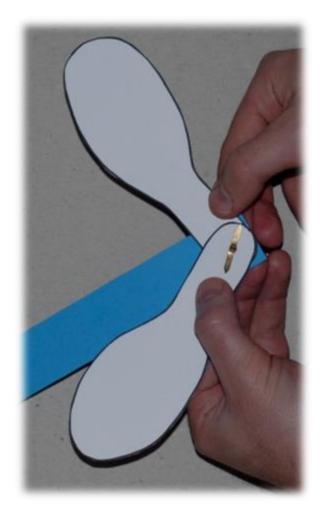

### Let's Get Practical! Tools and materials

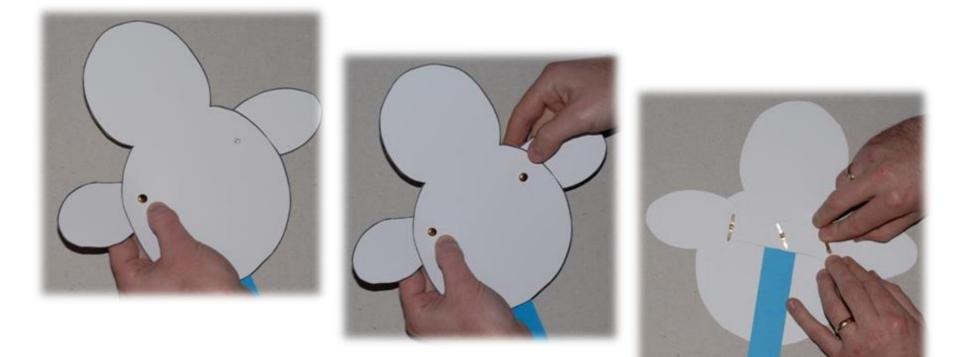

# Making the linkage

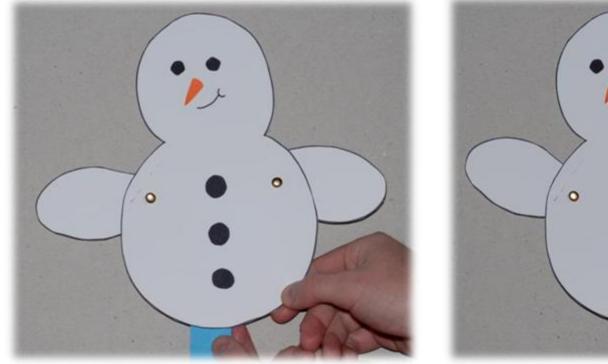

# The two fixed pivots

# The final design in action

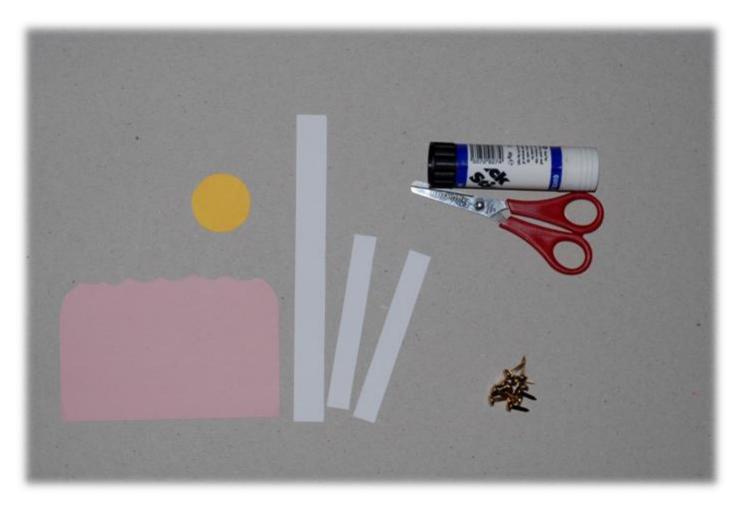

# A double lever and linkage

## Birthday cake

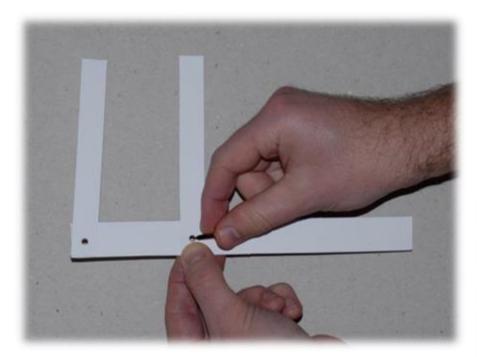

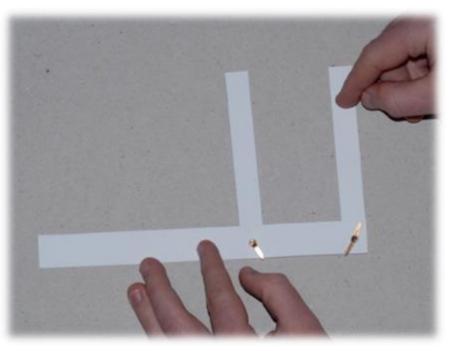

### **Tools and materials**

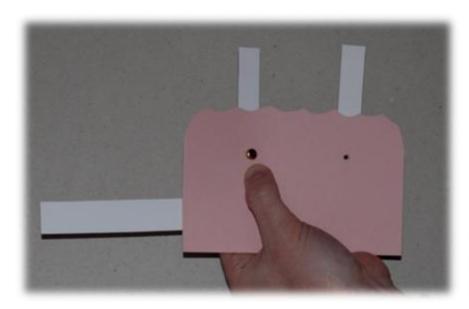

# Making the linkage

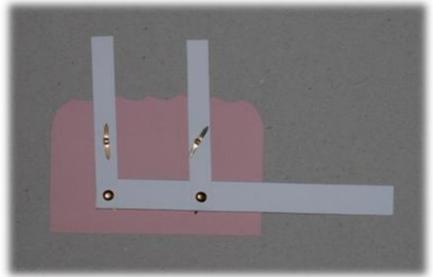

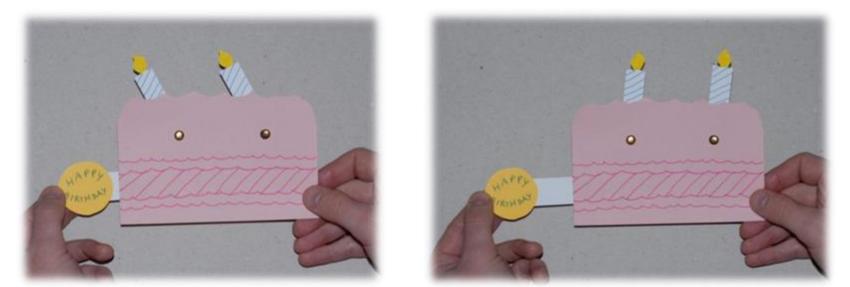

# The two fixed pivots

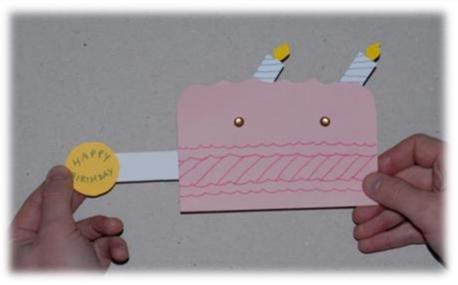

# The final design in action

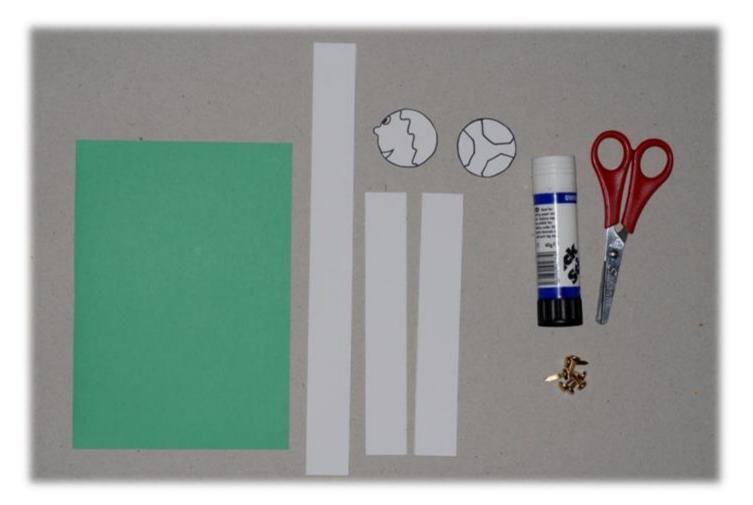

# A double lever and linkage

# Heading the ball

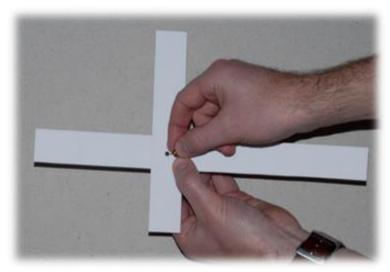

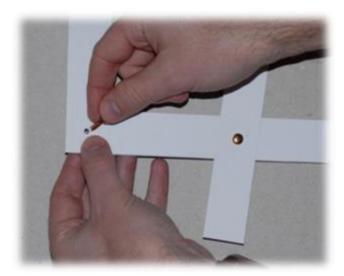

### **Tools and materials**

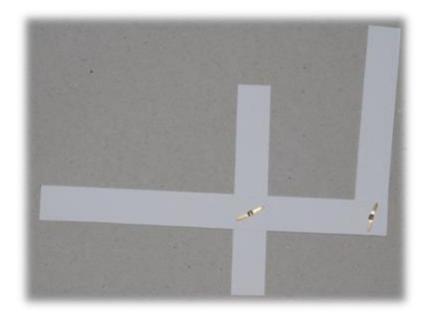

### Making the linkage

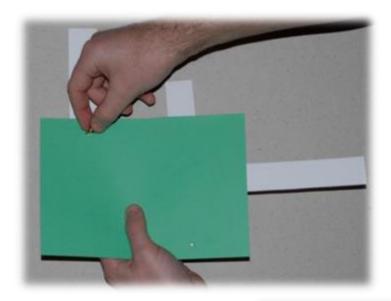

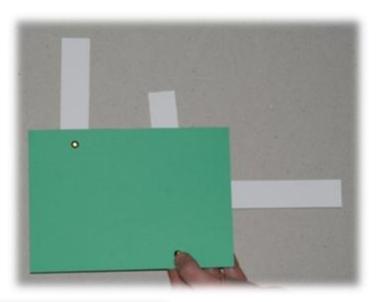

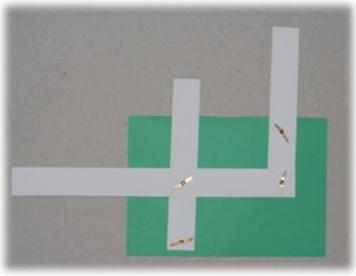

# Connecting the two fixed pivots

# The final design in action
